

www. **imk**-engineering.de

The IMK engineering GmbH was founded in 1990 and works as an independent development office in the fields of design and construction of special parts and special vehicles, mining and construction machinery, and the planning of complete systems. The IMK engineering GmbH operates internationally and is working on projects for clients in Europe, South Africa, and Asia.

Since 2005, the company is charged in addition to more development with the supply of special components and special equipment.

The IMK engineering GmbH is certified according to ISO 9001/2008 and is a member of the Association of innovative companies e.V.
